

<h1>NYC REMAC</h1>			
Advisory No.	2020-12		
Title:	RESCIND: Implementation of EMS Viral Pandemic Triage Protocol for Disaster Response		
Issue Date:	April 27, 2020		
Effective Date:	Immediate		
Supersedes:	2020-09	Page:	1 of 1

The Regional Emergency Medical Advisory Committee (REMAC) of New York City is responsible to develop, approve and implement prehospital treatment and transport protocols for use within the five boroughs of the City of New York. The Regional Emergency Medical Advisory Committee (REMAC) of New York City operates under the auspices of Article Thirty of the New York State Public Health Law.

The NYC REMAC proudly thanks the EMS Professionals tirelessly working to protect and serve the residents of NYC and recognizes that EMS provides an ESSENTIAL service to this city, state and country.

Due to a decrease in call volume the EMS Viral Pandemic Triage Protocol issued by the NYS DOH will no longer be in effect in the NYC region. Triggers for re-activation of disaster/pandemic based operational procedures and protocols are being developed and will be published shortly.

Current and Updated Protocols can be accessed at the Regional EMS Council website: www.nycremsco.org.

Owners/operators of Ambulance and ALS First Response Services providing prehospital medical treatment within the five boroughs of the City of New York are responsible to provide copies of the NYC REMAC Prehospital Treatment Protocols to their personnel, and to ensure that Service Medical Directors and EMS personnel are informed of all changes/updates to the NYC REMAC Prehospital Treatment Protocols.
